

Developing a Process to Streamline and Speed Up the Initiation of Disease Modifying Treatments

Melanie Russell^{1,2}, Sally Fox², Louise Pawson¹, Liz Watson², Cord Spilker² & Helen Ford¹

¹Leeds Teaching Hospitals NHS Trust and ²Bradford Teaching Hospitals NHS Foundation Trust

Do you wake up in the middle of the night screaming?

Did we do the prescription for DMF for Jo?

Is Delia waiting for an injector education session?

Has Megan been booked into the day case unit yet?

If so, here's the answer!

- ◆ A spreadsheet that breaks down the initiation process into five easy-to-manage stages
- ◆ Co-ordinator to update regularly and meet with team to discuss starters/switchers and stoppers to identify what needs to be done, when and by whom
- ◆ Keep this spreadsheet on a shared drive so it's accessible to the whole team
- ◆ Allows team to act proactively thus minimising delay in starting treatment
- ◆ Reduces phone call and e-mail traffic

Days waiting from DMT eligibility assessment to treatment initiation

Does it work?

Yes, an audit of treatment naïve patients showed reduction of 30% in waiting time from eligibility assessment to start date from 2016-2018.
