

MS Trust Conference Programme

Sunday 22 – Tuesday 24 March 2026

Programme title: Embedding evidence into clinical practice – Let's do it!

Sunday 22 March 2026

10:00 Registration and opening of conference exhibition

10:15-11:00 UKMSSNA new nurse workshop
Room 11

Therapists in MS (TiMS) new therapists meet and greet
Room 12

11:00-12:00 UKMSSNA AGM
Room 11

TiMS update meeting
Room 12

From 11:30 Lunch and exhibition
London suite & Rotunda

12:00-12:45 Satellite Symposium organised and funded by Neuraxpharm
Lakeside suite

13:15-15:15 Opening plenary session
Paris suite

13:20 Welcome and introduction – Lucy Taylor
MS Trust strategy and research updates

13:40 Revisiting MS diagnosis and terminology: understanding the new
criteria and evolving concepts (Relapse Associated Worsening (RAW),
Progression Independent of Relapse Activity (PIRA))

Dr Wallace Brownlee, Consultant Neurologist, University College London
Hospitals NHS Foundation Trust

Dr Agne Straukiene, Consultant Neurologist, Torbay and South Devon NHS
Foundation Trust

This session will explain the key updates to MS diagnostic criteria and how they enhance diagnostic accuracy and consistency. We will define and interpret emerging terms such as RAW and PIRA, highlighting their clinical and research significance, before exploring how updated terminology and diagnostic criteria inform multidisciplinary assessment and monitoring of progression. Finally, we will discuss practical approaches for communicating new concepts to patients and integrating them into holistic care planning.

**Multiple Sclerosis across the lifespan: promoting brain health and
optimising care in older adults**

14:10 Prof Jennifer Graves, Consultant Neurologist, Professor and Vice chair of Human Clinical Research, University of California, San Diego
Chris McMurran, NIHR Academic Clinical Fellow in Neurology, University of Cambridge

This session will investigate how ageing interacts with the biological mechanisms of multiple sclerosis and evaluate strategies to promote brain health and resilience in people with MS as they age. The session will also recognise how MS symptoms and disease presentation evolve over time, and discuss practical, person-centred approaches to managing MS in older adults, including adjustments to treatment, rehabilitation, and holistic care planning.

15:15-16:00 Refreshments, exhibition and poster viewing
London suite & Rotunda
Collect room keys from Conference registration desk in reception

16:00-16:45 Poster speed dating
Paris suite

Chairing a session
16:45-17:00 Dr Wendy Hendrie, MS Specialist Physiotherapist, MS Therapy Centre,
Room 11 Norwich

Notetaking for Conference Digest
16:45-17:00 Sue Cowling, head of communications and marketing, MS Trust
Room 12

17:00-17:45 Impact of OCREVUS (ocrelizumab) beyond the Infusion, *The Interactive Health Hour*
Satellite Symposium organised and funded by **Roche Products Ltd.**
Lakeside suite

18:00-18:45 Bringing TYSABRI SC Injection Closer to Home: Evidence, Experience, and Implementation of Self Administration
Satellite Symposium organised and funded by **Biogen**
Lakeside suite

19:30 Welcome dinner and quiz
Paris suite

Monday 23 March 2026

07:00-07:45 Morning yoga
Hansom Suite
Jody Barber, Consultant Physiotherapist Neuromuscular Diseases

08:00-08:45 The Evolving Role of Patient Reported Outcome Measures (PROMs) in MS
Satellite Symposium organised and funded by **Sanofi**
Lakeside suite

**09:00-10:15 Plenary session:
Paris Suite**

09:00-10:15 Leadership and service transformation in MS care

Sue Thomas, Independent Healthcare Consultant, Witheridge
Professor Helen Ford, Consultant Neurologist and Honorary Clinical
Professor of Neurology, Leeds Teaching Hospitals NHS Trust
Dr Kate Petheram, Consultant Neurologist, South Tyneside & Sunderland
NHS Foundation Trust

This session will examine current NHS strategies and workforce plans relevant to neurology and MS services, identify the challenges and opportunities for health professionals in adapting to system changes while maintaining safe, high-quality care for people with MS. It will reflect on how multidisciplinary teams can evolve services collaboratively, provide a national overview of NHS transformation programmes and explore practical approaches to service leadership and redesign.

**10:15-11:00 Refreshments, exhibition and poster viewing
London suite & Rotunda**

11:00-12:15 Concurrent seminars 1: Breaking it down

Seminar 1 Travel and MS: staying safe abroad with DMTs and immunosuppression

Joela Mathews, Lead Neuroscience Pharmacist, Barts Health NHS Trust
& Co-founder Transforming MS for All
Nicky Longley, Consultant in Travel Medicine, Hospital for Tropical
Diseases, UCLH
Mavis Ayer, MS Lead Community Nurse Specialist, University Hospital
Southampton NHS Foundation Trust

This session will explain key considerations for travelling with disease-modifying therapies (DMTs), outline vaccination and infection-prevention strategies for people on immunosuppressive MS treatments and discuss practical and holistic support for people with MS planning travel.

Seminar 2 Fatigue management for working people with MS

Rebecca Maguire, Academic Psychologist and Person with MS
Joanne Hurford, Occupational Therapist, University College London
Hospitals NHS Foundation Trust

This session will explore practical occupational therapy approaches to assessing and managing fatigue in people with MS who are in employment, identify workplace strategies and reasonable adjustments that can help individuals maintain productivity, wellbeing, and work-life balance. It will go on to examine the psychological and lived experience of fatigue in working life and highlight evidence-based coping techniques and self-management tools that empower people with MS to sustain employment and quality of life.

Seminar 3 **Pregnancy and MS: Pre-conception, DMT decisions, and Postpartum Management**

Dr Karen Chung, Consultant Neurologist, University College London Hospitals NHS Foundation Trust
Denisse Bongol, MS Specialist Nurse, University College London Hospitals NHS Foundation Trust

This session will outline evidence-based guidance on pre-pregnancy counselling and DMT selection, discuss management of MS during pregnancy and the postpartum period, including relapse risk, treatment timing, and breastfeeding considerations. It will go on to explore the nurse's role in supporting women through pregnancy planning and ongoing care, ensuring continuity, education, and emotional support and identify practical approaches to postpartum follow-up and multidisciplinary coordination.

**12:15-13:00 Lunch, exhibition and poster viewing
London suite & Rotunda**

13:00-13:45 Driving change in MS care: Leveraging real-world evidence from Barts for treatment-naïve and comorbidity-stratified populations

Satellite Symposium organised and funded by **Merck**
Lakeside suite

14:00-15:15 Concurrent seminars 2: Diving deeper

Seminar 1 **DMT Masterclass: From new to experienced prescribers – governance, audit, and evolving practice**

Professor Jeremy Hobart, Chief Scientific Officer at Transform MS CIC & Emeritus Professor University of Plymouth
Dr Owen Pearson, Consultant Neurologist, Swansea Bay University Health Board
Laura Carrington, MS Clinical Nurse Specialist, Leeds Teaching Hospitals NHS Trust
Sumrah Shaffiq, Advanced Clinical Pharmacist - Neurosciences & Workforce Development, Leeds Teaching Hospitals NHS Trust

This session will provide an overview of current and emerging DMT prescribing frameworks, discuss practical challenges and solutions in DMT prescribing, examine governance and auditing processes that support safe, effective, and compliant prescribing practice within multidisciplinary teams. It will also explore the evolving role of non-medical prescribers in MS care, including competence development, accountability, and collaboration with neurology teams.

Seminar 2 **Osteoporosis, bone health and Menopause: A Multidisciplinary Approach to Neurological Care**

Dr Kate Petheram, Consultant Neurologist, South Tyneside & Sunderland NHS Foundation Trust; Katrina Buchanan, Consultant Physiotherapist,

University College London Hospitals NHS Foundation Trust & Ruth Stross,
Director of Services, MS Trust

This session will discuss the neurological and systemic factors influencing bone health in people with MS, including the impact of menopause, reduced mobility, and long-term medication use. It will explore physiotherapy-led strategies to promote bone strength and prevent fractures, focusing on safe movement, exercise, and functional rehabilitation in neurological populations, and highlight the nurse's role in supporting women through menopause and bone health management.

Seminar 3

Advanced Clinical Practice in MS: The art of differentiation in complex consultations

Dan Kucharczyk, Advanced Clinical Practitioner (ACP) for Multiple Sclerosis, The Royal Wolverhampton NHS Trust

This session will examine the Advanced Clinical Practitioner (ACP) approach to MS consultations and recognise the challenges of polypharmacy and comorbidity in people with MS. It will explore strategies to identify medication-related or alternative explanations for symptoms and reflect on how advanced practice principles 'Jack of all Trades, Master of One'—support safe, autonomous decision-making and enhance collaboration with GPs and the wider multidisciplinary team.

15:15-16:15

Poster viewing and poster authors question time
Rotunda

Refreshments and exhibition
London suite & Rotunda

16:15-17:15

The Annual Helen Ley Lectures: plenary session
Paris suite

16:15-16:45

Assisted Dying Bill – legal, ethical and clinical perspectives for MS care

Fiona Chiplen, Consultant in palliative medicine, Weston Hospice care and Richard Huxtable, Professor of Medical Ethics and Law, Centre for Ethics in Medicine, Chair, UK Clinical Ethics Network, Chair, Board of EACME

This session will summarise the latest developments and proposed changes in assisted dying legislation across the UK, including their ethical implications and explore the ethical considerations and professional responsibilities that healthcare professionals must navigate. It will examine the practical and emotional impact of assisted dying discussions on health professionals and provide strategies for having open, person-centred conversations about end-of-life wishes within the current legal framework, ensuring patients and families feel heard and supported.

16:45-17:15

Future care planning – Navigating challenges and embedding good practice

Dr Ruth Isherwood, Consultant in Palliative Medicine and Training
Programme Director for Palliative Medicine, NHS Tayside
Sarah Roderick, Independent MS Specialist Nurse

This session will outline evidence-based and policy-aligned approaches to future care planning in progressive neurological disease, highlighting key principles of good practice in palliative and anticipatory care. It will discuss common challenges and ethical considerations when implementing future care planning and share practical strategies and recommendations for integrating future care planning into routine MS care. It will go on to explore the nurse's role in navigating sensitive conversations around prognosis, values, and preferences, while maintaining trust and person-centred support for individuals and families.

17:30–18:15 Satellite Symposium organised and funded by **Novartis UK Ltd.**
Lakeside suite

19:00 **Pre-dinner drinks**
Rotunda

19:30 **Conference dinner**
Paris suite

21:30 approx. **Disco**
Paris suite
Theme: Butterfly ball

Tuesday 24 March 2026

07:00-07:45 **Morning yoga**
Hansom Suite
Jody Barber, Consultant Physiotherapist Neuromuscular Diseases

08:00-08:45 **New McDonald criteria: What does earlier diagnosis mean for MS services, patient pathways and DMT selection?**

Satellite Symposium organised and funded by **Juvisé Pharmaceuticals**
Lakeside suite

09:00-10:15 **Concurrent seminars 3: Developing consultations**

Seminar 1 **Respiratory management in advanced and complex MS – Insights from the TiMS project**
Jody Barber, Consultant Physiotherapist Neuromuscular Diseases, University College London Hospitals NHS Foundation Trust
Ruth O'Regan, MS Champion - Physiotherapist, Norfolk and Norwich University Hospitals NHS Foundation Trust

This session will present key findings and learnings from the TiMS project on advanced respiratory management in complex MS, highlight evidence-based physiotherapy interventions and multidisciplinary approaches that optimise respiratory function and quality of life in people with advanced MS. It will also discuss practical implementation of respiratory management strategies across community and inpatient settings. We will share good practice recommendations and collaborative models.

Seminar 2 **Bridging the gap: Acute and community approaches to MS care**

Rachel Dorsey-Campbell, Senior Lead Pharmacist Neurosciences, Imperial College Healthcare Trust; Michelle Davies, Dorset MS Service Lead & Specialist Practitioner, University Hospitals Dorset NHS Foundation Trust; Joan Bradley, Rehabilitation Specialist Nurse, Hillingdon Hospitals NHS Foundation Trust

This session will highlight the role of acute multidisciplinary teams in managing complex MS presentations, discuss how integrated pathways and shared care models can enhance continuity and communication between acute and community MS services and examine the challenges faced by community teams supporting PwMS post-discharge. We will also share practical examples of collaborative working that improve patient experience and outcomes and lead an interactive discussion on key service challenges and priorities for improving the MS care journey.

Seminar 3 **Smart moves: How mobility wearables empower lifestyle management and promote brain health in MS**

Gavin Brittain, NIHR Clinical Research Fellow and Specialist Neurology Registrar, Sheffield; Ellen Buckley, Sheffield

Wearable mobility sensors are transforming how we understand and support people with multiple sclerosis. By capturing real-world movement and activity patterns, these technologies offer new ways to monitor disease progression, guide personalised interventions, and empower people to take an active role in their wellbeing. This session will explore how mobility wearables can be used in practice to empower people with MS, inform multidisciplinary care, and promote active, brain-healthy lifestyles.

10:15-11:00 **Refreshments and exhibition
London suite & Rotunda**

11:00-12:15 **Concurrent seminars 4: Living well**

Obesity, diet, and disease progression in MS: Evidence, challenges, and practical strategies

Seminar 1 Gail Shore, MS Clinical Nurse Specialist, The Royal Wolverhampton NHS Trust
Farah Suleman, Specialist Neurology Dietitian, University Hospitals Birmingham NHS Foundation Trust
Erik Forker, Specialist Neurosciences Dietitian, University Hospitals Birmingham NHS Foundation Trust

This session will examine how obesity and diet influence MS progression, symptom burden, and comorbidities and summarise evidence linking the Mediterranean diet. We will share practical, evidence-based lifestyle and dietary strategies for MS care where specialist input is limited. We will also discuss how weight and nutrition affect MS treatment planning, DMT efficacy, fatigue, and mobility and consider future directions for integrating nutrition and weight management into multidisciplinary MS care.

Seminar 2

Equity in action: Improving MS care in minority communities

Professor Helen Ford, Consultant Neurologist and Honorary Clinical Professor of Neurology, Leeds Teaching Hospitals NHS Trust; Dr Alison Thomson, Reader in Design, Queen Mary University of London; Sarah Watson, Advanced MS Champion, Leeds Teaching Hospitals NHS Trust

This session will examine how social determinants of health influence MS presentation, access to care, and outcomes in minority communities, and identify opportunities for more equitable service delivery. It will also explore how meaningful patient and public involvement can shape culturally sensitive MS services and improve trust, communication, and engagement in research. We will present case studies demonstrating participatory and community-led approaches to improving MS care pathways and reducing health inequalities among underrepresented groups.

Seminar 3

Living well with progressive MS – Research, resilience and real-world recommendations

Nikos Evangelou, Consultant Neurologist, University of Nottingham
Dr Silvia Poli, Postdoctoral Researcher and clinical psychologist at the University of Verona in Italy and programme manager for Living Well with Progressive MS (LIMS) project

This session will present findings from the Queen Elizabeth and international Living Well with Progressive MS studies and discuss clinical recommendations for improving outcomes and wellbeing in progressive MS. We will explore the psychological and behavioural dimensions of living well with progressive MS and share practical recommendations for embedding psychological wellbeing and self-management strategies into MS services.

12:15-12:30 Comfort break

**12:30-14:00 Closing plenary session
Paris suite**

12:30-13:00 Mind and MS: Understanding and managing mental health in Multiple Sclerosis

Dr David Okai, Consultant Neuropsychiatrist, South London and Maudsley NHS Foundation Trust

This session will examine the prevalence, mechanisms, and clinical presentation of mental health conditions in MS, including depression, anxiety, and adjustment disorders, and how these interact with neurological symptoms. It will also provide evidence-based recommendations for the assessment and management of mental health in MS.

13:00-13:30

Multiple Sclerosis and comorbidities: Challenges and opportunities for integrated and holistic care

Dr Charles Wade, Clinical Research Fellow & Neurology Registrar, University College London Hospitals NHS Foundation Trust

This session will describe the prevalence and impact of common comorbidities in people with multiple sclerosis, analyse the challenges of managing MS alongside comorbidities and apply evidence-based and holistic treatment strategies to optimise outcomes for people with MS and comorbidities.

13:30	Prize giving Flash talk posters Foundation Module student awards
13:40	Closing remarks
14:00	Lunch & departures

DRAFT

Declarations

The MS Trust would like to thank all our sponsors and exhibitors for their support.

Their sponsorship supports the educational sessions of the meeting. The content of these educational sessions has been developed by the MS Trust.

Sponsor and exhibitor declarations

Neuraxpharm UK Ltd has provided financial support for this meeting but has had no involvement in the agenda other than the stated Neuraxpharm satellite symposium. Neuraxpharm has had no input in the logistical arrangement of the meeting.

Roche Products Ltd. has provided financial support for this meeting, but has had no involvement in the content, aside from the sponsored satellite symposium.

Juvisé has supported this meeting through financial sponsorship and has had no involvement in the development of the agenda or educational content, nor in the logistical arrangements such as travel, accommodation, catering, or venue selection. The only exception is the clearly identified Juvisé-organised presentation.

Sanofi has had no influence over the content of the educational sessions at conference.

Biogen Idec Ltd. has provided financial support for this meeting, but have had no involvement in the agenda, arrangements, or content, aside from the sponsored satellite symposium.
